Interfaces & Namespaces

Interfaces

The Candera public interfaces are covered by the namespaces Candera and various subnamespaces of namespace Candera.

> All namespaces containing either **Internal** or **Private** in the name cover private namespaces, which are not recommended to be used in any application, as it is not guaranteed that these interfaces remain stable respectively exist in any future release. Changes in any of these private namespaces can be applied without any (prior) notifications.

Namespace Candera

- Candera Graphic Engine
- MetaInfo
- Runtime Type Information
- Candera Asset Loader
- Candera Widgets

Namespace Candera::Animation

- Animation
