

Candera Engine 2D

Support Collapsible Nodes in Layout

An additional option "Collapsible" is available in the "Layout" options of every node. When this option is enabled, the node position and/or node size is not taken into account for layout when "Enable Rendering" property of a node is set to "false".

New methods have been added for setting/retrieving of the collapsible flag -
Layouter::SetCollapsible and Layouter::IsCollapsible.
