SceneComposer Usability Improvements

Display Solution Controls as Vertical List

The solution controls are displayed as a vertical list instead of horizontal icon list (Mantis 8629).

FTCCmd Rules for Operations on Solutions Opened in SceneComposer

The following rules are applied when FTCCmd is used on a solution which is already loaded in SceneComposer:

- the Info with Convert No option, Generate with Convert No option and ExportScl commands will not attempt locking;
- the Info with Convert Yes option, Generate with Convert Yes option and Import commands will attempt locking and fail if solution is already loaded in SceneComposer (Mantis 8499).

Shader Compiler Plugin for Intel Apollo Lake

A new shader compiler plugin was created for Intel Apollo Lake platform. In this way it is possible to optionally compile the shaders (binary shader) for the desired target (Mantis 8405).
