General 3.9

- Changes in MixedReality sample
- Removal of Candera Safety sample

Changes in MixedReality sample

MixedReality sample has been modified and uses the new Video Stream (Video Stream) functionalities. Furthermore, the intro video is played in a infinite loop instead of once, which is realized with the new condition behavior (Check Video State) and action behavior (Configure and Play Stream).

Removal of Candera Safety sample

Candera Safety sample, which was added in version 3.4.1, has now been removed in version 3.9. Support for Candera Safety will be dropped until further notice.
